	2005-2007	Phelps Stokes Fellowship (UTK)
	1999	Knickerbacker Poetry Prize (UTK)

WORKSHOPS

Mixtape Sessions, an online platform that helps bring training in econometrics methods at low cost to people throughout the world by recruiting high impact econometricians to teach over Zoom and through my own workshops both on Mixtape Sessions and off. This is part of my effort to get the latest methods to people who need them no matter who they are, where they are or what their background is. Mixtape Sessions had 18 workshops in 2022 and 1,968 students. In 2023, so far, there have been 6 workshops and 1,156 students. Speakers have included myself, Peter Hull, Rocio Titiunik, Alberto Abadie, Mark Anderson, Dan Rees, Jon Roth, and Brigham Frandsen.

Off of the Mixtape Sessions platform, I have also been doing workshops since 2021 to a variety of groups, both within academia and outside. In 2021, I did workshops for around 2,000 people (including 1,500 for an online workshop I did called CodeChella). In 2022, it was closer to 700 over 16 workshops. And so far in 2023, it's been around 400 people over 7 workshops.

Providing these workshops to the broader public is part of my effort to "pay it forward", a comment that Al Roth once said to me after I told him that his generosity towards me would be hard to pay back. He told me to instead pay it forward. So I have tried to create a bridge that links people to a variety of methods, sometimes to the econometricians themselves, in as valuable a delivery system as I can. This is largely my service to the profession.
