SERVICE: WORKSHOPS

I teach causal inference workshops around the world as part of my service to the profession. This includes both online and in-person instruction through two main channels: the Mixtape Sessions platform and independent workshops I conduct directly with institutions and organizations.

Mixtape Sessions is an online platform I co-founded that connects people globally to modern econometric methods in causal inference. The platform has hosted approximately 60 workshops since 2021, reaching over 8,000 participants and featuring speakers including myself, Ariel Pakes, Jeff Gortmaker, Brant Callaway, Peter Hull, Rocio Titiunik, Alberto Abadie, Mark Anderson, Dan Rees, Jon Roth, and Brigham Frandsen. In addition to these platform-based workshops, I have conducted 30-40 independent workshops directly with firms, universities, government agencies, and private organizations worldwide.

I pursue this work because I believe econometric pedagogy has not always reached people in a timely manner, particularly regarding design-based causal inference methods that have transformed applied microeconomics. My goal is to help connect researchers everywhere to these modern methods, regardless of their institutional affiliation or geographic location.

SERVICE: PODCAST

In addition to workshops, I have been performing an "oral history" of the profession of the last 50 years using podcasting. I have interviewed approximately 130 economists ranging from Nobel Laureates, John Bates Clark Award Winners, theorists, economists in tech, and various historical groups (e.g., students of David Card). The goal is to listen to the personal stories of living economists and over time create a selected oral history of the profession.
